

# INDEXU 7

## Google Maps Integration

By Dody Rachmat W. (dodyrw@gmail.com)  
August 27, 2011

Indexu shows google maps on detail page. The information for google maps is gathered from listing's detail :

- address
- city
- state
- zip
- country

In order to activate google maps integration, you need to get Google Maps API key. This API Key must be obtained for each website you have. To get the API Key, go to the following url:

<http://code.google.com/apis/maps/signup.html>

## Sign Up for the Google Maps API

### Thank You for Signing Up for a Google Maps API Key!

Your key is:

```
ABQIAAAAXlwK9KULfPWytoUchK-amBQ7RTOPTeaCvNUg3GdLWVFcH7hkdRStkpLt5_sjZh35lnVCCm3U04TRRw
```

**Note:** for more information on the API key system, consult <http://code.google.com/apis/maps/faq.html#keys>

How you use your key depends on what Maps API product or service you use. Your key is valid for use with solutions. The following examples show how to use your key within the Maps API product family.

Enter the API Key in Indexu admin panel.

**Admin Panel > 3rd Party > Google**

#### Google API Setting

Enable Google Map

☒ Yes ☐ No
